

What's New For You

ETJ Data Available On MNP

Summer 2026

BLUF: Most Sailor personal data, including from the Electronic Training Jacket (ETJ), are now available on MyNavy Portal (MNP) through the new MyData page. MyData is currently a beta release and will continue to receive updates and upgrades in the future.

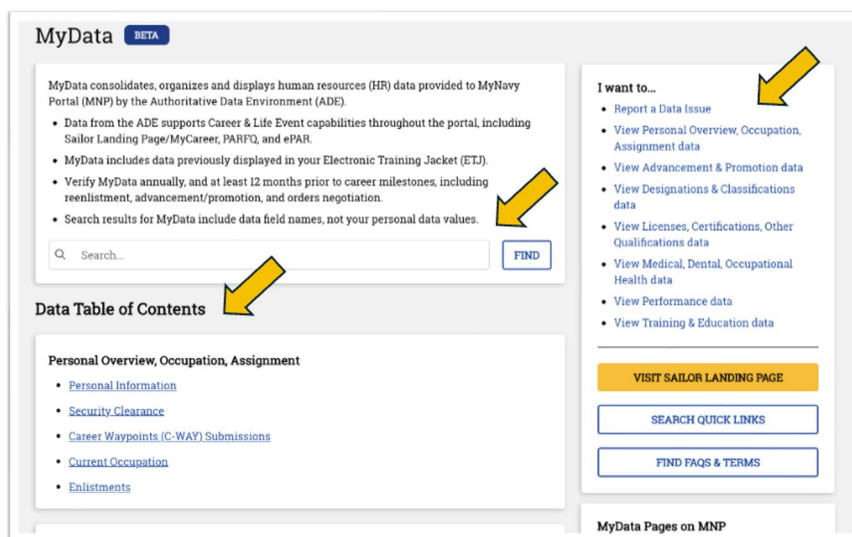

Advantages of Using MyData

MyData, found on the MNP website, is the most convenient and secure way to access your personal information. MyData gives Sailors access to self-service tools and support. Sailors can quickly get resources for data management, report discrepancies via MyNavy Career Center (MNCC) Service Requests, and access official gateways to their Official Military Personnel File (OMPF), the Navy Standard Integrated Personnel System (NSIPS) Electronic Service Record, and more.

Finding ETJ Data on MNP

Sailors can access MyData by logging onto the MNP homepage, selecting the **Military HR Records** dropdown menu and clicking **MyData Table of Contents**. Users can also enter <https://www.mnp.navy.mil/group/my-record/mydata> directly into their browser.

On the MyData page, Sailors can find their personal data and records by either scrolling through the table of contents, which is sorted by data groupings, or via a keyword search. Data groupings are also available on the menu on the right side of the screen.

Once a Sailor has found the required information, they have the option of exporting the file for printing or use offline. If any Sailor data appears incorrect, users should use the **Submit MNCC Service Requests** tool to report the issue and request correction.

Sailors are encouraged to send feedback so that their suggestions and critiques can be incorporated into future updates. Sailors can send feedback directly to the MNP team via the floating yellow icon on the bottom-right corner of the screen.
